

Emaan Fatima

Work permit: Pakistani | **Date of birth:** 30 Nov 2005 | **Nationality:** Pakistani | **Gender:** Female | **Phone number:** (+92) 3335035185 (Mobile) | **Email address:** emaan.fatima.312005@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/emaan-fatima-919269343/> | **Whatsapp Messenger:** +92 3335025185 | **Address:** H#1389 stadium road,rwd, 46000, rawalpindi, Pakistan (Home)

ABOUT ME

I am a Software Engineering student with a strong interest in software development, artificial intelligence, and modern web technologies. I have hands-on experience with Python, C++, JavaScript, React, Next.js, and machine learning, along with experience developing academic and personal projects. I enjoy solving practical problems through technology, learning new tools, and turning ideas into functional and user-focused solutions. I am eager to gain international experience, further develop my technical skills, and contribute to innovative software projects.

EDUCATION AND TRAINING

1 SEP 2023 – CURRENT Islamabad
BS SOFTWARE ENGINEERING International Islamic University, Islamabad

Field of study Software Engineering | **Level in EQF** EQF level 6

29 JUN 2026 – CURRENT rawalpindi, Pakistan
INTERNATIONAL CERTIFICATION OF ARTIFICIAL INTELLIGENCE NAVTTC

- Data Analysis
- Machine Learning
- Machine Learning Model Training
- Natural Language Processing (NLP)
- Deep Learning
- Computer Vision (upcoming)
- Microsoft Azure AI (upcoming)

Field of study Artificial Intelligence

SKILLS

Stack Frontend (HTML, CSS, Javascript) | Node.js | Next.js | Python (computer programming) | C++ | TypeScript | Git | JavaScript | MySQL | HTML | PostgreSQL | MongoDB | Express.js | CSS | Tailwind CSS | Figma | Github | SQL | React.js | Machine learning | Deep Learning | Model training | Kaggle | Trello | Java | React | Website development | Visual Studio | Eclipse IDE | Pycharm | Google colab | Artificial Intelligence | ERD

Soft Skills

Communication skills | Software documentation | Time Mangement | Adaptability | Team Management | Content management

WORK EXPERIENCE

WEB DEVELOPER INTEREN – CORVIT SYSTEMS – 29 Jun 2026 – 22 Aug 2026 – ISLAMABAD, PAKISTAN

- Developed the COTSLE website using Next.js and modern web development practices.
- Built responsive and user-friendly web interfaces for different sections of the platform.
- Implemented reusable components and integrated frontend functionality to support the website's features.
- Worked with APIs and backend services to connect the frontend with application data.
- Debugged, tested, and maintained website functionality throughout the development process.
- Collaborated with the development team to implement features and improve the overall user experience.

WEB DEVELOPER & CO-FOUNDER – SIGNATURE TRIPS – 20 Jun 2026 – 25 Jul 2026 – ISLAMABAD, PAKISTAN

-
- Designed and developed the company website, focusing on responsive design, usability, and a professional online presence.
 - Implemented and maintained website features, content, and functionality according to business requirements.
 - Performed regular website maintenance, updates, troubleshooting, and improvements.
 - Contributed to the company's digital strategy and online presence as a shareholder.
 - Collaborated on business and technical decisions related to the website and digital operations.

VIRTUAL ASSISTANT – NOBLE QS – 1 Mar 2024 – 1 Jun 2024 – DUBLIN, IRELAND

- Managed day-to-day administrative tasks and provided virtual assistance to support business operations.
- Managed and maintained company social media accounts, including content preparation, scheduling, and engagement.
- Monitored and managed professional email communication, including responding to inquiries and organizing incoming messages.
- Managed the main administrative dashboard and maintained accurate records and information.
- Coordinated routine administrative activities and supported the team with organizational and operational tasks.
- Assisted with digital marketing and online presence management to improve communication with clients and audiences.

● **PROJECTS**

Time Bank Skill Exchange platform

TimeBank | MERN Stack

TimeBank is a skills exchange platform that enables users to exchange knowledge and services without using money. Instead, users earn time credits by teaching or providing a skill, which they can then spend to learn a skill from another member. The platform was developed using the MERN stack, with features designed to support user interaction, skill exchange, and time-credit management.

Blockchain Donation Tracker

Blockchain Donation Tracker | Blockchain & Web Development

Developed a blockchain-based donation tracking system designed to improve transparency and accountability in charitable donations. The system records donation transactions on a blockchain, allowing donors and organizations to track contributions and verify transaction history. The project demonstrates the practical use of blockchain technology for creating secure, transparent, and tamper-resistant donation records.

Lost & Found Management System

Lost & Found Management System | Java & MySQL

Developed a desktop-based Lost & Found Management System using Java and MySQL to streamline the reporting, management, and retrieval of lost and found items. The system allows users to report lost or found items, manage item records, search for relevant items, and support the verification and claiming process. The project demonstrates object-oriented programming, database management, and CRUD-based application development.
